Green Energy Project

Help us build a solar panel array. This will be a model for sustainable energy projects in Southwest Lansing.

Why is this Important?

We all need to do our part to reduce greenhouse gases and save the planet.

This is what The Southside Community Coalition endeavors to instill in our children while we work in partnership with others to create a green environment in our part of Lansing.

With the help of the Capital Area chapter of the Michigan Interfaith Power and Light, other generous donors and YOU we can do our part to create and sustain a healthy planet.

Our Environmental Commitment

The Southside Community Coalition is committed to improving our urban environment. In the last four years we have partnered with the Capital Area Soccer League, Kerrig Dr. Pepper, Kaboom Playgrounds, the City of Lansing, Ingham County Health Department, Robert Wood Johnson Foundation Invest Health Project, the Southwest Action Group (SWAG), Mid Michigan Environmental Action Council, the Mayor's Neighborhood Advisory Board, as well as neighborhood organizations and churches, to redevelop our neighborhood and create a beautiful natural urban environment.

The Green Energy Project is a continuation of these efforts.
